

Rules for the Board Game Tsuki (突棋), 10th Edition

A deterministic two-player abstract strategy game.

1 Setup

1. The board is an 8×8 square grid. Two players sit facing each other across the board.
2. The row closest to each player is called that player's back rank. The farthest row is the opponent's back rank.
3. There is only one type of piece. Each piece has an orientation and is placed facing the opponent.
4. At the start of the game, each player places one piece on every square of their back rank.

2 Turn order

1. A turn consists of a single move of one piece to a different square.
2. Players alternate turns, with the first player moving first.
3. Passing, moving multiple pieces, or taking consecutive turns is prohibited.

3 Movement only

1. A piece can move any number of empty squares in one direction: $\nwarrow, \uparrow, \nearrow$.
($\uparrow$ means forward.)
2. A piece cannot move onto an occupied square, nor jump over another piece.

4 Capturing and movement

1. A piece can capture an enemy piece and move onto its square only if that piece is exactly one square away in one of these directions: $\leftarrow, \searrow, \uparrow, \nearrow, \rightarrow$.
2. Captured pieces cannot be reused.

5 Winning the game

A player wins by moving a piece onto the opponent's back rank if that piece is not captured on the opponent's next turn.

6 Notation

1. The First Player is represented by $\square$, and the Second Player by $\blacksquare$.
2. From the First Player's perspective, a square is denoted as "x.y", where:
 - x is the column number counted from right to left.
 - y is the row number counted from the far side toward the near side.
3. The direction of movement is indicated by an arrow.
4. A move is written as:
" $\square$ (or $\blacksquare$), destination square, direction arrow."
Example: " $\square$ 2.3 $\nearrow$ ", " $\blacksquare$ 4.5 $\downarrow$ "
